## ABOUT US

*Acumen Cognitive Technology (ACT) is a special task force of I.T. world with small but elite team that always get the jobs done right way more than just some tech guys.*

*This team was assembled because of its members from different background came together and agreed that something must be done to refine the existing process of their individual operations. With that resolve, the humble team that soon turned to be an elite team was assembled.*

*The initial team members consists of:*

- a doctorate in Artificial Intelligence who has spent decade in research of the subject of A.I.;*
- a public accountant who has seen changes in the process and compliance environment which can be automated;*
- a business developer who saw opportunity to help customers streamlining their operations;*
- a senior management in financial and operational who was frustrated with the traditional processes and has been promoting digitalization and refinement of process over the years; and*
- a corporate service providers who has seen the benefits that automation and intelligence system can bring.*

*With the support of all our elite team members, ACT is proud to deliver good solutions and services to our clients.*
